Epics

Each epic is a user-visible outcome, not a technical layer. Size is for a 4-person team with AI assistance (S ≈ half a day, M ≈ 1 day, L ≈ 1.5 days).

ID	EPIC	OUTCOME STATEMENT	PRD FEATURES	SIZE	PRIORITY
E1	**Find the right hotel**	A guest can find, compare and understand hotels that fit their budget, distance and facility needs.	F1, F4, F5	M	MUST
E2	**Pre-book and arrive**	A guest can hold a room with a Booking ID, and the hotel can accept it and verify the guest on arrival.	F2	M	MUST
E3	**See live facility crowds**	Hotel staff can update crowd counts in seconds, and a booked guest can see a trustworthy heat map with alerts and wait ranges.	F3	M	MUST
E4	**Wait smarter**	A checked-in guest can join a virtual queue and use the wait for a quieter activity.	F6	S	SHOULD
E5	**Trusted listings**	Only verified hotels accept bookings, managers can register and keep details current, and the admin can spot outdated data.	F5, F7, F10	M	SHOULD
E6	**Help in my language**	A guest can ask questions in English or Tamil, by text or voice, and reach emergency help fast.	F8, F9	S	COULD

Build order: E1 → E2 → E3 (Must-Have demo flow complete) → E4 → E5 → E6. QA tests each story as it lands; nothing in E4–E6 starts until E1–E3 acceptance criteria pass.
